- Front door with tempered glass and lock and also available in metal door.
- Good ventilation and heat dispersion

Description

Opterna recessed 12-inch cabinets are suitable for use in residential apartment and functions as a common point for consolidating triple play services. This shallow depth of the cabinet enables the device to be flush mounted into the wall.

The cabinets are designed with 12-inch mounting profile and can be used in conjunction with other Opterna 12-inch product like the 12-inch, 12 port patch panel and the 12-inch cable manager with rings.

The cabinet features a lockable glass or metal door, adjustable front profiles and entry cable ports at the top and bottom.

The recessed 12-inch cabinet is designed with a removable front door along with a removable outer frame. The front door can be removed to change the door opening orientation from left to right or right to left. The removable outer frame facilitates easy installation of the cabinet when it must be flush mounted into the wall.

Applications

- Telecommunication Enclosure
- LAN & WAN Networking
- SOHO
- FTTH

Standards

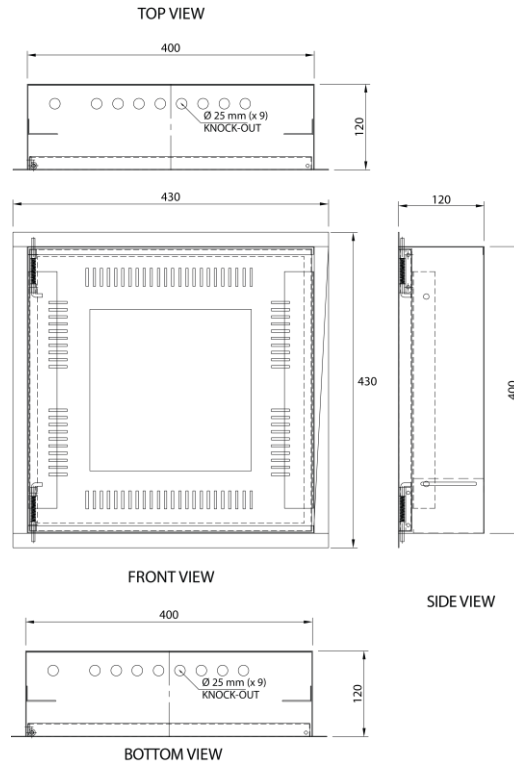

- IEC 60529 (IP 20)
